Dear Lawrence

Hope this mail finds you well! It is so glad to hear that Raj had shared my idea with you. I have already created the tables and you can see them with attached files. Also following are some alterations during my creation:

```
Newspaper> alter table Stories
            add constraint Stories_Authors_authorID_fk
                foreign key (authorID) references Authors (authorID)
[2023-11-13 01:46:01] completed in 144 ms
Newspaper> alter table Stories
            add constraint Stories_Sections_sectionID_fk
                foreign key (sectionID) references Sections (sectionID)
[2023-11-13 01:46:01] completed in 199 ms
```

```
Traning> alter table Classes
          add instructorID int null
[2023-11-13 02:04:46] completed in 98 ms
Traning> alter table Classes
          add constraint Classes_Employees_employeeID_fk
              foreign key (instructorID) references Employees (employeeID)
[2023-11-13 02:04:46] completed in 145 ms
```

```
Traning> alter table Records
            modify dateTaken datetime null
[2023-11-13 02:08:34] completed in 143 ms
```

Hopefully my databases will be helpful. Have a lovely day!

Regards,

Jun
